PATCH NOTES - royal-demo 1.4.1

Package	royal-demo
Version	1.4.1
Release time	23 June, 00:17:44
Trigger	Scheduled deployment

Fixes

- 1. Removed an undocumented "royal-preview" mode that could display unauthorised sample data during a demonstration.
- 2. Corrected an access-log rounding bug that could mislabel event times in minute-level summaries.

Operational note

The team did not want the buggy hidden preview shown before it was fixed. This is the issue referenced in the chat line about not showing the patch notes.
